DECASOFT

Application as a Senior Fullstack Software Developer

Dear Recruiter,

My name is Christopher Okokon Ntuk, a B.Sc. in Computer Science graduate. With over four years of experience in software development, I am applying to be part of your team as it would be a great opportunity for me to further grow both professionally and personally while I add value to your organization.

I worked as a junior software developer, during my internship at Anakle Nig. Ltd where I gained industry standard experience and in few years' time, became a software developer in Infostrategy technology where I spent most of my time developing high-scalable web applications, whatsapp chatbots and RESTful APIs.

My fluency in scripting/programming languages like PHP, Node JS, Laravel/Lumen, JavaScript, VueJS; and advanced knowledge of developer applications, tools, methodologies and best practices. A solid understanding of RESTful API's and passionate about writing clean, efficient and maintainable codes

I believe I am a good fit for your company and I look forward to speaking with you soon.

Sincerely

Christopher Okokon Ntuk
